

Your Go-to Microsoft Partner to Digitally Transform Your REIT

We help you transform your real estate investment trust with Microsoft Business Solutions, AI, and Domain 6 Industry-focused Accelerators.

Top 3 Focus Areas for REITs

AI-Driven Portfolio Optimization

REITs will increasingly rely on AI and predictive analytics to optimize portfolio performance, identify high-yield assets, and mitigate risks. Real-time data will enhance investment decision-making, allowing REITs to rebalance portfolios based on market conditions and tenant demand.

Enhanced Investor Transparency & Digital Engagement

With increasing demand for real-time reporting and ESG (Environmental, Social, Governance) disclosures, REITs need to focus on automated investor portals, digital dividend distributions, and AI-powered financial reporting to maintain stakeholder confidence and meet regulatory expectations.

Smart Property & Lease Management for Operational Efficiency

REITs are embracing IoT-powered smart buildings, automated lease tracking, and tenant experience platforms to improve asset utilization, reduce operational costs, and enhance tenant retention—critical for long-term portfolio growth and stability.

About Us

Domain 6 Inc. is a Microsoft partner whose primary purpose is to help leaders in real estate, construction, senior living, and professional services firms quickly enable their organizations with the right technology solutions.

Boost Your Standard Dynamics 365 Functionality with Domain 6 Accelerators

Dynamics 365 Finance & Operations

With automated financial consolidation, multi-entity accounting, and AI-driven forecasting, D365 Finance & Operations simplifies the complexities of managing large real estate portfolios. The platform ensures seamless GAAP, IFRS, and SEC compliance, while its real-time dashboards provide investors and stakeholders with clear visibility into fund performance and asset valuations.

Dynamics 365 Sales

Microsoft Dynamics 365 Sales equips REITs with intelligent tools to enhance investor relations, streamline deal management, and drive higher capital inflows. With AI-driven insights, automated engagement tracking, and centralized stakeholder management, REITs can strengthen relationships with institutional investors, retail shareholders, and property partners.

Asset Management Accelerator

Manage all sorts of complex structures, giving you visibility over the complete portfolio of assets you own or operate. Gain end-to-end lease tracking, occupancy insights, and property performance monitoring.

AVAILABLE ON
Microsoft AppSource

Debt Management Accelerator

Improve transparency and efficiency of your external and internal lending processes – from loan application all the way up to complete loan repayment. Track debt as a borrower or lender and report fees and taxes properly.

AVAILABLE ON
Microsoft AppSource

Property Operator Agent

Manage portfolios, assets, and daily operations with ease and efficiency by using Copilot, trained specifically for real estate. Use natural language to process large amount of data and get answers in seconds.

Some of our clients:

A leading REIT managing a \$5 billion property portfolio partnered with Domain 6 to streamline financial consolidation, enhance investor reporting, and automate compliance tracking. By implementing Microsoft Dynamics 365 Finance & Operations, the firm reduced financial reporting time by 40%, improved forecasting accuracy, and enhanced transparency with investors.
